## Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

#### NAMES AND LABELS

- ▲ Image elements do not have [alt] attributes
- ▲ Links do not have a discernible name
- Select elements do not have associated label elements.

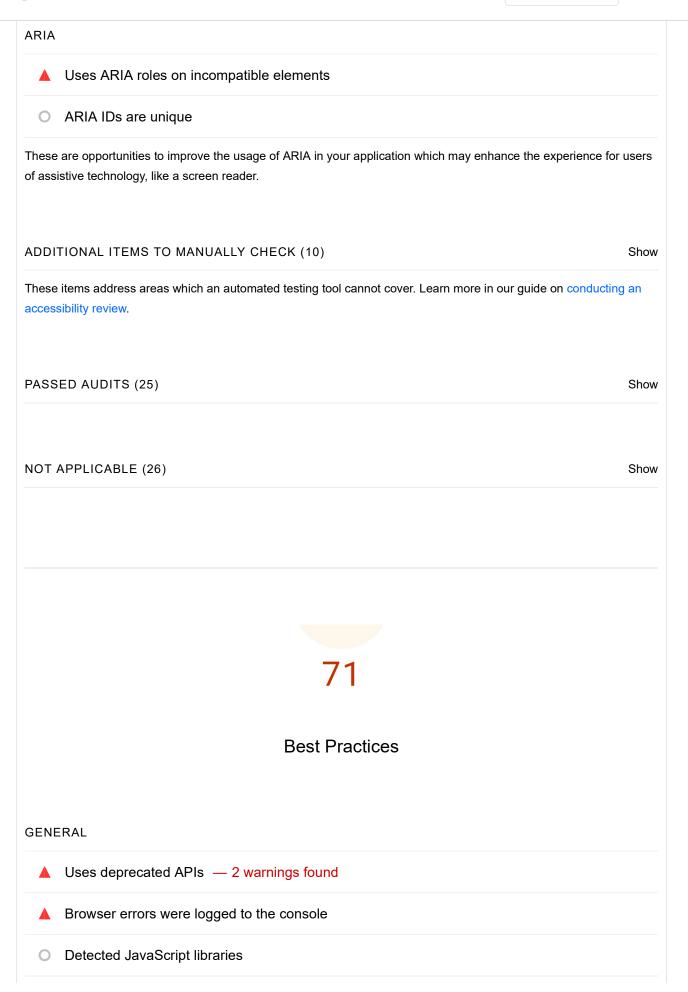

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

#### **BEST PRACTICES**

Touch targets do not have sufficient size or spacing.

### **SEO**

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on Core Web Vitals. Learn more about Google Search Essentials.

#### CRAWLING AND INDEXING

Links are not crawlable

To appear in search results, crawlers need access to your app.

Docs

▲ Image elements do not have [alt] attributes

Format your HTML in a way that enables crawlers to better understand your app's content.

ADDITIONAL ITEMS TO MANUALLY CHECK (1)

Show

Run these additional validators on your site to check additional SEO best practices.
